Certificate II in Information, Digital Media & Technology

This two-year certificate is for students intending to develop their Information Communication and Technology (ICT) skills so that they can be an effective ICT user or employee. The endorsed program provides four hours of practical and class-based training per week.

The qualification provides foundation general computing and employment skills that enable participation in an information technology environment in any industry. ICT underpins all Australian industries. ICT skills are needed in many current and emerging occupations.

The qualification requires students to complete eight core units and six electives over two years.

Units within Certificate II Information, Digital Media and Technology:

- Operate application software packages
- Integrate commercial computing packages
- Operate a digital media technology package
- Work and communicate effectively in an IT environment
- Operate database applications
- Design basic organisational documents using computing packages
- Participate in OHS processes
- Participate in environmentally sustainable work practices
- Use computer operating systems and hardware
- Use social media tools for collaboration and engagement
- Create 2D digital animations
- Produce and prepare photo images
- Perform basic vision and sound editing
- Capture a digital image

At the completion of this certificate students are guaranteed entry into a full-time qualification at Central Institute of Technology, the State’s leading provider of vocational training in Information, Digital Media and Technology. In addition, Central Institute of Technology has pathways to University study. Details of tertiary options are available from the Central Institute website (www.central.wa.edu.au).

Year 12 students commencing this qualification in 2014 will receive partial credit.

This qualification is nationally recognised and provides up to 22 State Training Provider entry points and 9 unit equivalents for WACE.
